

Advanced Budgeting & Cost Management Estimating, Budgeting And Cost Control

Course Description:

Budgeting and cost analysis are crucial elements for the management of contemporary organizations. Nowadays, if companies want to stay competitive, they are urged to link their strategies with accurate systems of resource allocation and performance measurement. Along this line, budgeting, as well as tracking, controlling & reducing cost represent essential activities to be performed and monitored by organizations as they implement their key processes, activities and operations. In addressing these issues, this course is relevant for those professionals & analysts facing the difficult challenge of improving performance while reducing costs of those processes for which there are accountable. This course provides participants with key cost awareness and budgetary skills, which are essential for managing and controlling resources in times of increasing global competition where the budgets are inextricably linked with both the achievement of strategic objectives as well as with evaluation of future plans and initiatives. In particular, this seminar enables participants to:

- Link budgeting and costing with strategy execution
- Understand the critical factors which have an impact on business processes
- Discuss about modern system of cost analysis for budgeting purposes
- Master the budgeting and financial skills required for better decision-making
- Identify sources of financial and operational data to support the budgeting process
- Explore the best practices required to manage the multiple organizational performances

The Training Course will highlight:

- Organizational Impact
 - Cost and budgeting awareness will be enhanced
 - Higher chances to design or select a budgetary system that works
- • Broadened knowledge of performance management techniques
 - Better attitude to link cost and budgeting to strategy and performance measurement
 - Deeper understanding of cause-and-effect relationship for budgeting purposes
