

-
- **Professional Facilities & Equipment Management for Specialists**

Course Description:

- This course features how to establish, implement, manage, and continually improve your facility department to get the best out of your facilities within the given boundaries of costs, performance, and other important factors during its total lifetime. This interesting course is designed to develop delegate's skills in managing facility staff and corporate assets while minimizing risk exposure in the workplace. As the Facilities Management (FM) function continues to evolve, this course offers the latest thinking in the profession, right balance between asset performance (functionality, availability, reliability, safety), and will tackle specific issues encountered on the ground and apply best practices in discussing real solutions.

The Training Course will highlight:

- This course will feature:
- - Proper knowledge of the basic principles of facilities management
 - How to apply best practices according to several norms
 - Understanding how to operate and maintain facilities as a business within a business.
 - Sharing of facilities management experience
 - Insights regarding current state of facilities management processes and possibilities to improve them.

Course Objective:

By the end of this course delegates will learn about:

- Understand the basics of facilities management.
- Understand how to draw up a preventive maintenance concept, based on risk.
- Develop strategies to decide when and what to outsource.
- Understand the different contract types.
- Identify and monitor the facilities management-processes performance.
