

RISKMANAGEMENT: Identification, assessment, and prioritization of risks (defined in ISO 31000).

Course Description:

All organizations face the increasingly complex challenge of managing a wide variety of risks and opportunities effectively. Some of these risks are well understood and managed; others are less well understood, inadequately managed or simply ignored. Organizations need to enhance resilience in the face of ever complex and increasingly global risks and the framework outlined in ISO31000 embodies international best practice that is applicable to all types and sizes of organization. Knowledge of the requirements of ISO31000 will enable you to bring the benefits of effective risk management into all aspects of your organizations including planning, operations and communication.

The Training Course will Highlight?
